

accessible from the outside of said [socket] receptor body,
a pair of locking elements mounted in said [socket] receptor
body in operative relationship to said actuator means at a
position between the spaced prongs for selectively engaging the
punched holes of the male plug locking the prongs of the male
plug to said [socket] receptor body,

*b1
cma*
said actuator means being movable to a first position for
permitting insertion and removal of the prongs relative to said
locking elements, and

 said actuator means being movable to a second position in
 said receptor for urging said pair of locking elements in
opposite directions into locking contact with the prongs of the
 male plug.

Respectfully submitted,
